

Product Leader with 9+ years of experience building and scaling enterprise AI platforms, agentic developer tooling, and data infrastructure across Fortune 100 organizations and high-growth startups.

Work Experience

Group Product Manager, AI and Data Platforms | Capital One Jan 2025 - Present

- Drove **\$168M** in measured business value across 18K+ engineers and analysts by leading 0-to-1 strategy for an **agentic AI platform** that autonomously rewrites legacy code and analytical workflows at enterprise scale, defining the model evaluation framework and self-improvement system for multi-agent orchestration
- Led technical data migration strategy for the **largest financial services data migration** on record, 1.2 exabytes across 45,000 datasets, architected the analytical data platform behind the first cloud-native financial core at a major U.S. bank
- Built and led a **30-person** cross-functional product, engineering, and ML organization that drove adoption of AI tooling, saving **820K+ engineering hours** within 3 months of launch

Senior Product Manager, Unstructured Data | Docugami: Document AI June 2022 - Jan 2025

- Led product strategy for a document intelligence product that converts complex financial documents into queryable knowledge graphs, growing booked revenue from <\$500K to **\$3.5M+** across 6+ Fortune 100 accounts
- Spearheaded **0-to-1 launch of self-service B2B platform** enabling business users to build and deploy agentic document workflows, reaching **71% adoption** among leading US commercial insurance brokers
- Improved **document parsing accuracy by 37%** over OpenAI GPT-4o (2024) benchmarks by defining evaluation criteria and directing fine-tuning of open multimodal reasoning models for production data pipelines

Product Manager, Simulation & Robotics | Haply Robotics Jan 2020 - June 2022

- Designed and launched the **Inverse3**, a haptic robotics device enabling tactile VR/AR training experiences, generating **\$2.2M in ARR** across surgical training use cases (MIS, Orthopedic, & Dental)
- Partnered directly with the CEO to raise **\$5M+ deep tech seed round** while managing a 10-person product and operations team through 0-to-1 hardware and software development
- Shipped **developer-friendly SDK and API** enabling third-party platform integrations, driving **16x adoption** growth among developer ecosystems building surgical-simulation content

Skills

Data Platforms | LLM Evaluation | Agentic AI | RLHF | Analytics | SQL | Python | Cloud-Native Architecture
Streaming Systems | Data Governance | Observability | Medallion Architecture | Financial Technology

Publications

- Named inventor on **5 patents** for healthcare devices, robots, and ML technology
- [Haply 2diy](#), an accessible haptic platform suitable for remote learning: paper presented at ICMI 2021
- [Baby's First Bessel](#), a children's book about partial differential equations in cylindrical coordinates

Education

Bachelor of Mechanical Engineering, McGill University, GPA: 3.96/4.00 2019

Projects

Google Calendar Natural Language Input ([Chrome Extension](#)) 2024-Present

- Built a deterministic NLP interface for Google Calendar as a Chrome extension that reduces event-creation time by 90% vs default UI; adopted by 600+ professionals, including teams at Keller Williams Realty

Icebreaker Energy (icebreakerenergy.com) 2025-Present

- Founded a climate-tech non-profit that reduces commercial building HVAC costs by 40% and supports decarbonization and climate sustainability programs with ice batteries and thermal virtual power plants

OpAI Innovations (opaiinnovations.com) 2025-2026

- Technical lead and engineering manager for the first intra-operative surgical platform for breast reconstruction engineered to reduce surgical error and revision rates
